#### Dave.

The only requirement is to have an approval letter. Ray has all the required components in the draft letter that we are all reviewing.

## A few observations:

- 1. We won't be able to put the additional info about the monitoring wells in the approval letter. We'll want this as a separate letter to the file.
- 2. We probably want to use the date of submital as the date in the revised amended letter to come from TCEQ.
